SUMMARY

Senior Unity Developer with 9+ years of experience building and operating F2P mobile games for iOS and Android using Unity and C#, across both 2D and 3D projects. Specialized in scalable gameplay architecture, LiveOps systems, modular UI frameworks, animation and VFX integration, backend integrations, and performance optimization for live-service games. Proven experience leading engineering teams, developing reusable systems, and collaborating across gameplay, backend, and product disciplines in fast-paced production environments.

SKILLS

PROGRAMMING LANGUAGES

C#, .NET, Python, JavaScript, TypeScript, C++

GAME DEVELOPMENT

Unity, 2D Games, 3D Games, Addressables, ScriptableObject, Prefabs, UI, uGUI, UI Toolkit, Animation (Animator, Timeline), Visual Effects (Particle System, VFX Graph), Audio Integration (AudioMixer), Asset Management, Gameplay Systems, Physics Systems, State Machines, Behavior Trees, Unity 6, URP, Cinemachine, IL2CPP, Event-driven Architecture, Animation Rigging, NavMesh, Occlusion Culling, Shader Graph

ARCHITECTURE & ENGINEERING

OOP, SOLID, Systems Architecture, Modular Framework Design, Client Architecture, Data-Driven Systems, Network protocols, Dependency Injection (DI), Asynchronous Programming, Interface Abstractions, Assembly Definitions (asmdef), Design Patterns, Data-Oriented Design, Code Review, Code Refactoring, UML, Editor Scripting, Custom Inspectors, Object Pooling

MULTIPLAYER & BACKEND

Photon Fusion 2, PUN2, Client-Server Architecture, REST APIs, WebSockets, Backend Service Integration, Firebase, LiveOps, Monetization, Analytics, Ads, Amazon Web Services (AWS), Remote Config, Facebook Instant Games

DEBUGGING & PROFILING

Unity Profiler, Memory Profiler, Frame Debugger, Unity Test Framework, Profiling, Mobile Optimization, Memory Optimization, Performance Optimization, Unity IAP

TOOLS & WORKFLOW

Git, GitHub, GitHub Actions, GitHub Pages, GitLab, Bitbucket, Jira, CI/CD, JetBrains Rider, Agile/Scrum, Confluence, Microsoft Teams, Kanban, game-ci, Visual Studio, Plastic SCM

AI & PRODUCTIVITY TOOLS

Claude, ChatGPT, GitHub Copilot, Cursor, Gemini

PLATFORMS

Android, iOS, PC, WebGL, macOS

FRAMEWORKS & LIBRARIES

DOTween, UniTask, Zenject, TextMeshPro, Newtonsoft Json, JsonUtility, MVVM, MVC

EXPERIENCE

Senior Unity Developer @ [Estoty](#)

June 2024 - January 2026 · Vilnius, Lithuania · On-site

- Contributed to shipped mobile titles including [Frost World](#), [West Escape](#), [Raptor Evolution](#) and [0].
- Architected and implemented gameplay systems and reusable UI modules, including animated UI components, transitions, and VFX-driven feedback, for mobile game projects.
- Optimized gameplay performance and memory usage across Android and iOS devices using Unity Profiler and Memory Profiler.
- Collaborated within a fast-paced R&D environment focused on rapid prototyping and feature iteration across 2D and 3D gameplay.
- Contributed to technical decision-making, code quality improvements, and scalable project structure.

Unity Software Engineer (Slots Era / R&D) @ [Murka](#)

October 2022 - February 2024 · Dnipro, Ukraine · Remote

- Maintained and extended live-service mobile game infrastructure for [Slots Era](#), including UI animations, audio cues, and asset pipelines.
- Integrated gameplay modules, backend services (REST APIs), and platform-specific technical improvements.
- Coordinated multi-platform release processes for iOS, Android, Windows, and Facebook platforms.
- Improved project stability and deployment workflows in collaboration with cross-functional teams.

Game Development Lead @ [Evistep](#)

September 2020 - October 2022 · Yerevan, Armenia · On-site

- Led a team of 6 engineers and 4 artists responsible for mobile game development and technical delivery.
- Defined studio-wide technical architecture standards and development workflows.
- Designed reusable cross-project frameworks and scalable modular UI systems, including animation and asset management conventions.
- Oversaw project planning, technical mentorship, and engineering process improvements.

Unity Game Developer @ [Evistep](#)

January 2017 - September 2020 · Yerevan, Armenia · On-site

- Developed mobile titles including [Businessman ONLINE](#), [Submarine Simulator 3D](#), Tank Simulator 2: Epic Battle, and Helicopter Simulator, across both 2D and 3D environments.
- Built gameplay mechanics, UI systems, animations, prefab-based content pipelines, physics simulations, and monetization integrations.
- Integrated Photon multiplayer systems (client-server communication via APIs), AWS cloud services, Firebase, and advertising SDKs.
- Optimized mobile projects for performance, responsiveness, and platform compatibility using profiling tools.

Full-Stack Web Developer @ [Iguan Systems](#)

October 2014 - December 2016 · Yerevan, Armenia · On-site

- Developed web applications using PHP and JavaScript technologies.
- Worked with frameworks including AngularJS, Laravel, Yii, and Zend Framework.
- Managed SQL and NoSQL databases including MySQL and MongoDB.
- Supported backend infrastructure, deployment pipelines, and server maintenance.

EDUCATION & LANGUAGES

Yerevan State University

2013-2015

Master of Science — Mathematical and Software Development of Computing Machines, Complexes, Systems and Networks

Armenian NATIVE **English** PROFESSIONAL **Russian** FLUENT
